

## System Change – Not Climate Change

For a large demonstration and People's Assembly on 16th December

At the climate demonstration on 12 December 100,000 participants showed the world that we will not accept our leaders putting national interests and business profits over the future of our planet and our children.

10 years after the collapse of the WTO conference in Seattle, we saw once again the strength of a movement that has gathered different groups from trade union activists to environmentalists, to farmers from the global south. Together, we have created a movement that on the behalf of the world population demands **Climate Justice Now!** Our movement has put the politicians who gather at the Bella Center under enormous pressure, and it is getting clearer everyday that passes that COP15 will not bring us closer to a solution to global climate change.

Perhaps, we face a breakdown in negotiations. The rich world's leaders don't want a fair deal, they don't want any agreement at all!! The world's people both South and North will not accept this. The arrest of 1,000 protesters at the demonstration on 12 Dec. shows that they are under pressure. **Following this, large numbers of the NGO delegates will be excluded from the Bella Center from Tuesday morning, another sign of their weakness.**

Much talk has been made of Obama participating in COP15, but this will not solve anything. Obama is at the top of the system which created the climate problem.

### DEMONSTRATE – Reclaim the Power! Wed. 16 Dec.

We invite everyone to participate in the demonstration Reclaim Power on 16 December – activists, campaigners, trade unionists and the excluded NGO delegates. We must demonstrate, because we support the requirement for action by the world's peoples, because they are our future, it is our planet, because we do not accept the criminalisation of our demonstrations, and because we do not accept that the voice of the people is being excluded from the Bella Center! Like Saturday, we expect the demonstrators to be peaceful. We hope the same will be true of the police.

A new, international climate movement has been born. Whatever happens at the talks in Copenhagen, we will come out stronger, more organised and more determined. The world's politicians have failed to solve both the economic and environmental crises, now it is over to us. We demand **Climate Justice Now!**

We will meet at the Klimaforum (DGI City) 7.00am, and assemble at 8:00am at Tårnby station where the demonstration starts.
